

一、详细说明：包括场景、截图、漏洞重现的方法，涉及账号相关漏洞，请提供测试账号，若复现过程复杂，可录制视频，上传至云盘，附链接。

访问：<https://hao123.train.qunar.com/build.xml>

```
<!-- build -->
<arg line="-jar"/>
<arg path="${yui-jar}"/>
<arg value="--charset"/>
<arg value="UTF-8"/>
<srcfile/>
<arg line="-o ${root.dir}/scripts/jex/import.min.js"/>
</apply>
</target>
<target description="min.js" title="pack" name="min.js">
  <jspack rootpath="${root.dir}" file="scripts/pack/book.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/common.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/index.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/list_num.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/queryDetail.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/searchbox.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/station.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/stationToStation.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer_delete_prompt.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer_list.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer_pub.pack.js"/>
  <echo>min done!</echo>
</target>
<property name="ssh.host" value="59.151.51.41"/>
<property name="ssh.user" value="hao.lin"/>
<property name="ssh.password" value="linhao1234"/>
<property name="ssh.localRoot" value="/" />
<property name="ssh.deployRoot" value="/server/flight.qunar.com/htdocs/site/" />
<target name="upload to 41" depends="min.js">
  <echo>start uploading</echo>
  <scp sftp="true" verbose="true" trust="true" password="${ssh.password}" todir="${ssh.user}@${ssh.host}:${ssh.deployRoot}">
    <fileset dir="${root.dir}">
      <svnModified/>
    </fileset>
    <fileset dir="${root.dir}">
      <svnAdded/>
    </fileset>
  </scp>
  <echo>finish uploading</echo>
</target>
<target name="国际机票价格 to 41" depends="min.js">
  <echo>start uploading</echo>
  <scp sftp="true" verbose="true" trust="true" password="linhao1234" todir="hao.lin@59.151.51.41:/server/flight.qunar.com/htdocs/site/">
    <fileset dir="${root.dir}">
      <svnModified/>
    </fileset>
  </scp>
  <echo>finish uploading</echo>
</target>
<target name="国际机票价格 to 41" depends="min.js">
  <echo>start uploading</echo>
  <scp sftp="true" verbose="true" trust="true" password="linhao1234" todir="hao.lin@59.151.51.41:/server/flight.qunar.com/htdocs/site/">
    <fileset dir="${root.dir}">
      <svnModified/>
    </fileset>
  </scp>
  <echo>finish uploading</echo>
</target>
```

泄露数据库账号密码，等敏感信息

二、漏洞证明（在这里写POC）

```
<!-- build -->
<arg line="-jar"/>
<arg path="${yui-jar}"/>
<arg value="--charset"/>
<arg value="UTF-8"/>
<srcfile/>
<arg line="-o ${root.dir}/scripts/jex/import.min.js"/>
</apply>
</target>
<target description="min.js" title="pack" name="min.js">
  <jspack rootpath="${root.dir}" file="scripts/pack/book.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/common.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/index.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/list_num.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/queryDetail.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/searchbox.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/station.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/stationToStation.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer_delete_prompt.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer_list.pack.js"/>
  <jspack rootpath="${root.dir}" file="scripts/pack/transfer_pub.pack.js"/>
  <echo>min done!</echo>
</target>
<property name="ssh.host" value="59.151.51.41"/>
<property name="ssh.user" value="hao.lin"/>
<property name="ssh.password" value="linhao1234"/>
<property name="ssh.localRoot" value="/" />
<property name="ssh.deployRoot" value="/server/flight.qunar.com/htdocs/site/" />
<target name="upload to 41" depends="min.js">
  <echo>start uploading</echo>
  <scp sftp="true" verbose="true" trust="true" password="${ssh.password}" todir="${ssh.user}@${ssh.host}:${ssh.deployRoot}">
    <fileset dir="${root.dir}">
      <svnModified/>
    </fileset>
    <fileset dir="${root.dir}">
      <svnAdded/>
    </fileset>
  </scp>
  <echo>finish uploading</echo>
</target>
<target name="国际机票价格 to 41" depends="min.js">
  <echo>start uploading</echo>
  <scp sftp="true" verbose="true" trust="true" password="linhao1234" todir="hao.lin@59.151.51.41:/server/flight.qunar.com/htdocs/site/">
    <fileset dir="${root.dir}">
      <svnModified/>
    </fileset>
  </scp>
  <echo>finish uploading</echo>
</target>
<target name="国际机票价格 to 41" depends="min.js">
  <echo>start uploading</echo>
  <scp sftp="true" verbose="true" trust="true" password="linhao1234" todir="hao.lin@59.151.51.41:/server/flight.qunar.com/htdocs/site/">
    <fileset dir="${root.dir}">
      <svnModified/>
    </fileset>
  </scp>
  <echo>finish uploading</echo>
</target>
```

三、修复方案：
